

DROUGHT CONDITIONS

Despite recent rains, we're not seeing major improvements in drought status (down one percentage point to 57 percent of the state) or statewide reservoir storage (storage down 50,000 acre-feet as of last Thursday). However, the runoff pump is primed (soil moisture levels are up), and more rain is on the way over the next week.

Drought statistics

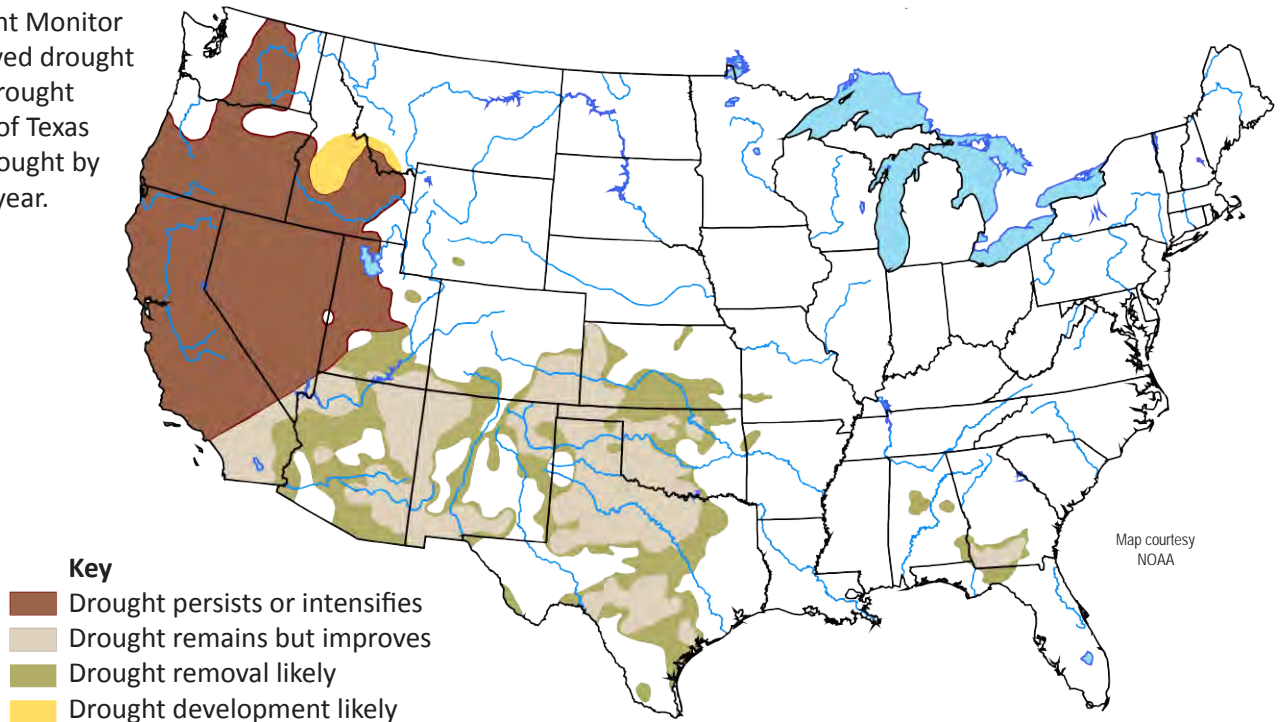

- 57% of state currently in moderate to exceptional drought
- 58% a week ago
- 71% three months ago
- 86% a year ago

U.S. SEASONAL DROUGHT OUTLOOK

September 18 through December 31, 2014

The U.S. Drought Monitor projects improved drought conditions or drought removal for all of Texas impacted by drought by the end of the year.
