

# Water Weekly

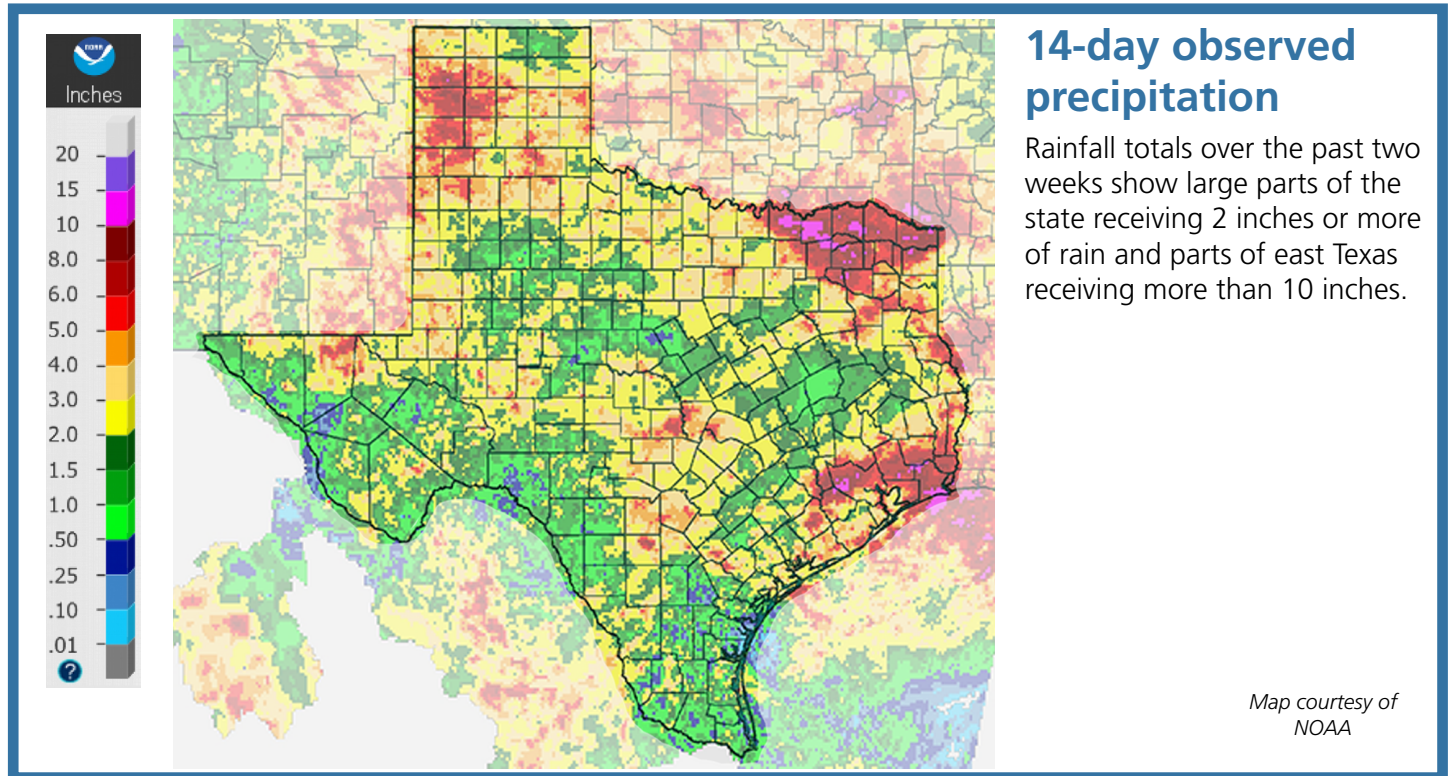

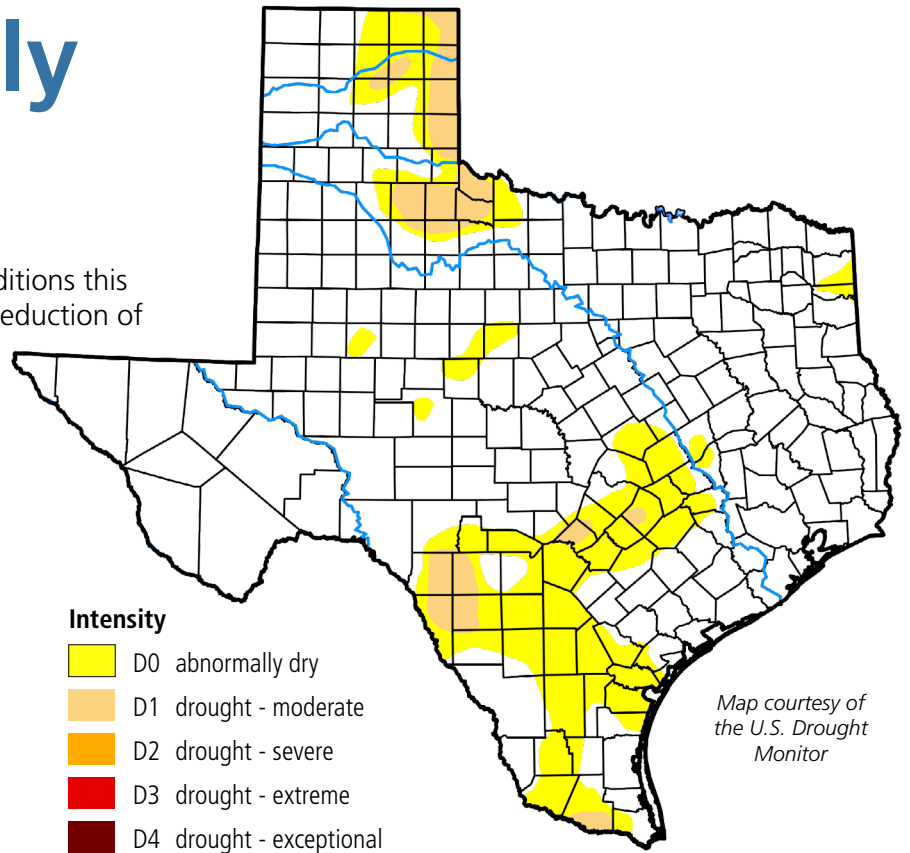

For the week of 08/14/17

## Water conditions

Texas saw big improvements in drought conditions this week with the exit of severe drought and a reduction of moderate drought by half. Nonetheless, statewide reservoir storage decreased by 60,000 acre-feet, an indication of summer usage levels, limited run-off, and non-uniform rainfall. Drought conditions remain in the Panhandle and central and south-central Texas.

## Drought conditions
