

Water Weekly

For the week of 02/11/19

Water conditions

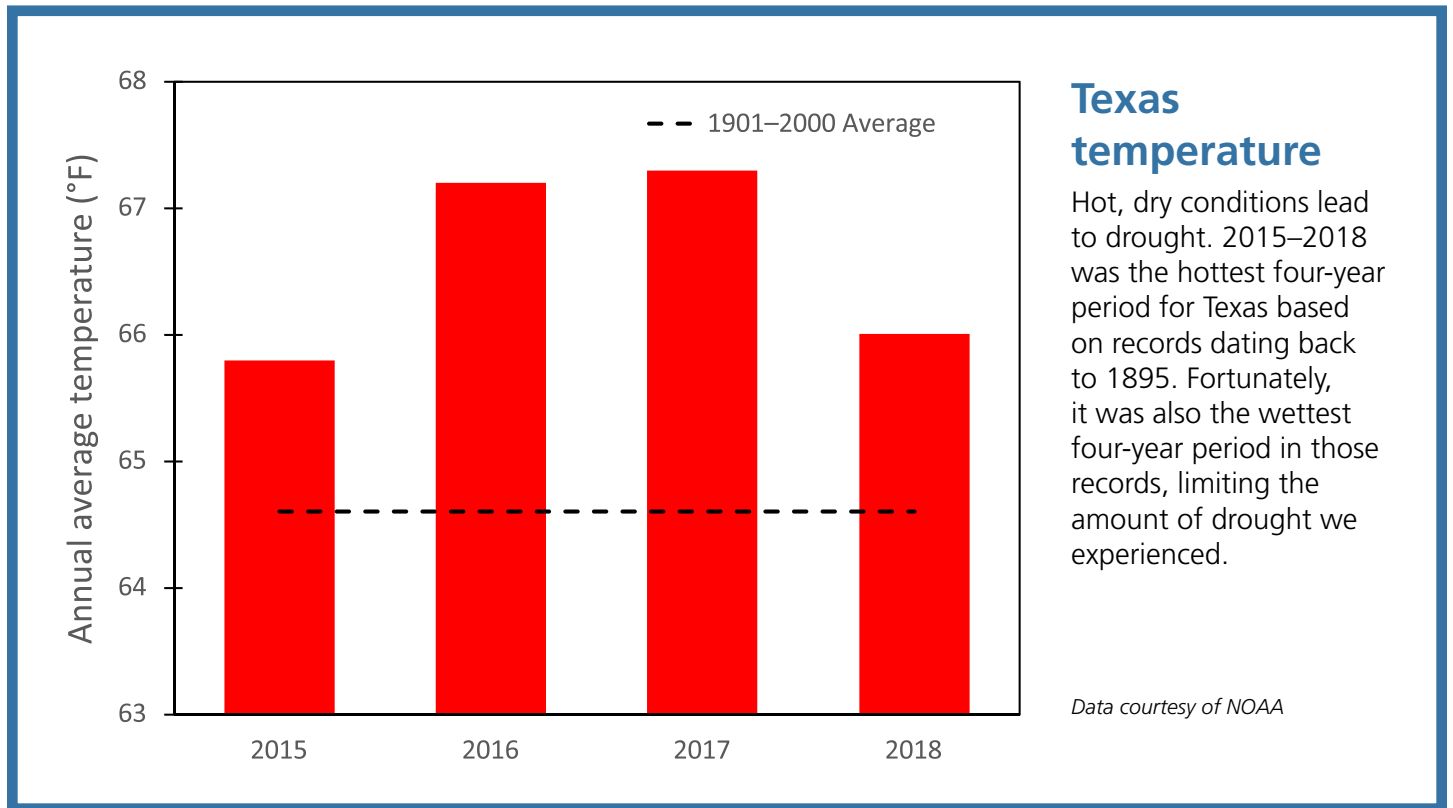

The latest drought map shows development of a new patch of drought in Dimmit County in South Texas.

Overall, drought is impacting 2 percent of the state. Another 16 percent of the state is abnormally dry and vulnerable to drought development in the next few weeks.

Drought conditions

- ◆ 1% three months ago
- ◆ 65% a year ago

Texas temperature

Hot, dry conditions lead to drought. 2015–2018 was the hottest four-year period for Texas based on records dating back to 1895. Fortunately, it was also the wettest four-year period in those records, limiting the amount of drought we experienced.
