

# Water Weekly

For the week of 08/11/25

## Water conditions

The latest drought map for conditions as of August 5 shows improvements from the previous week in West and Central Texas and degradation in South Texas. The net change, a small decrease, pushed the total area of drought in the state to its smallest extent since October 2021.

## Drought conditions

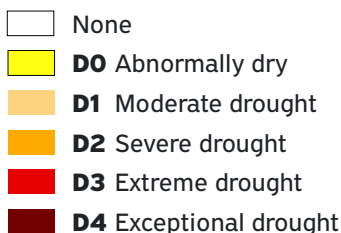

**19%** now

**20%** a week ago

**46%** three months ago

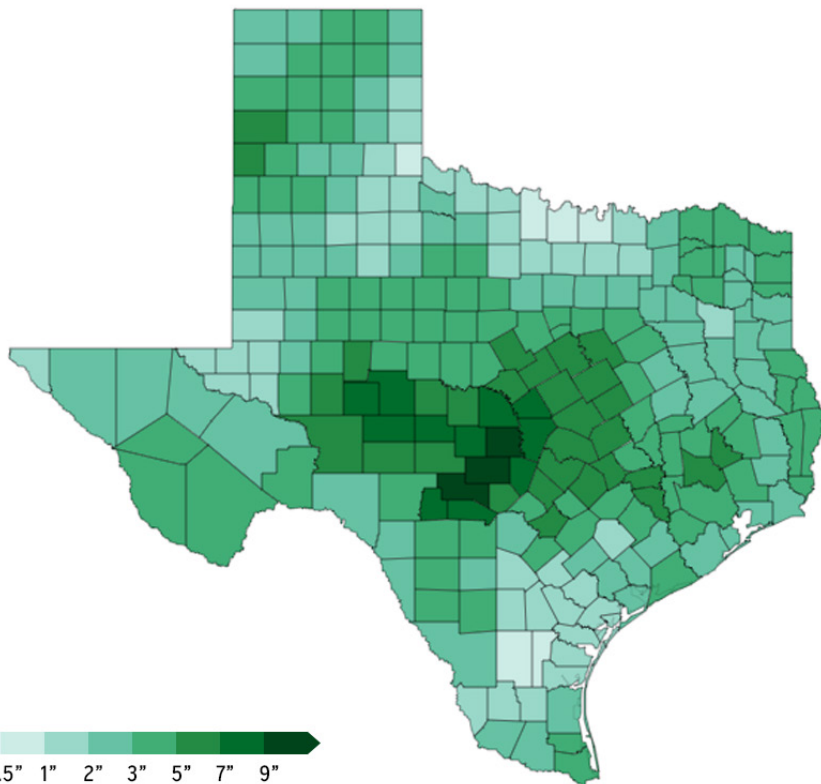

**24%** a year ago

### Intensity

## July 2025 precipitation

With 3.4 inches of precipitation averaged across the state, July 2025 was the 24th wettest July for Texas in 131 years. With more than 9 inches of rainfall, it was the wettest July for Llano County and the second wettest for Gillespie and Kerr counties.
