

DROUGHT CONDITIONS

Another week of rain, another week of improvement. Statewide reservoir storage is up by more than 600,000 acre-feet, and the latest drought monitor shows the absence of extreme drought in Texas for the first time since November 2010. However, despite all the rain, reservoirs in West and South Texas and the Hill Country continue to remain well below normal.

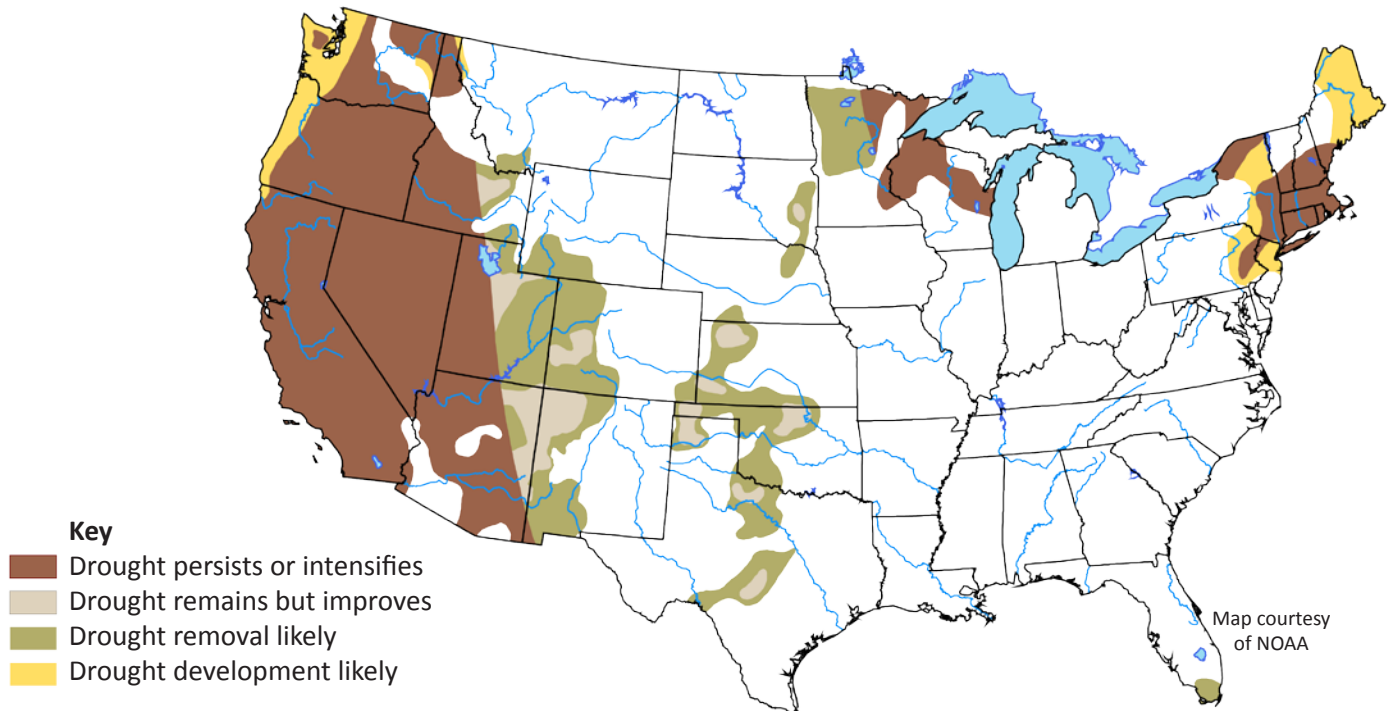

Drought statistics

- 15% of state currently in moderate to exceptional drought
- 23% a week ago
- 43% three months ago
- 72% a year ago

U.S. SEASONAL DROUGHT OUTLOOK

The latest U.S. Seasonal Drought Outlook shows drought removal and improvement through the end of August.
