

Water Weekly

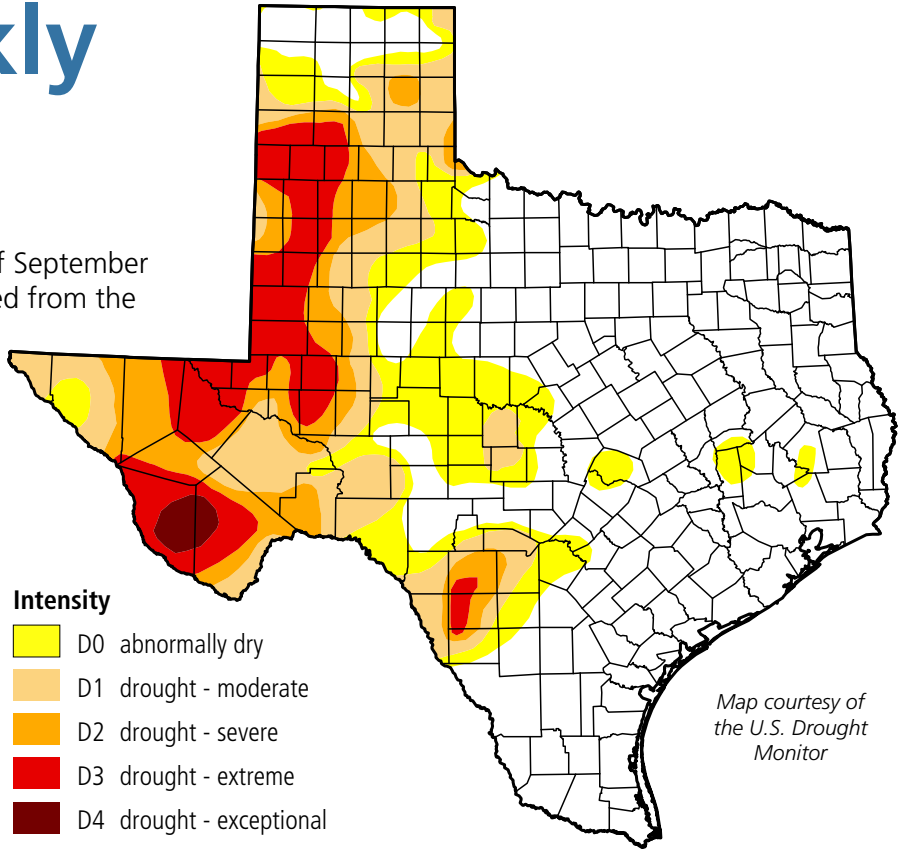

For the week of 09/28/20

Water conditions

The latest drought map for conditions as of September 22 shows drought almost entirely eliminated from the eastern half of the state. Unfortunately, much of the western half of the state remains in drought with little prospect for improvement in the next few months.

Drought conditions

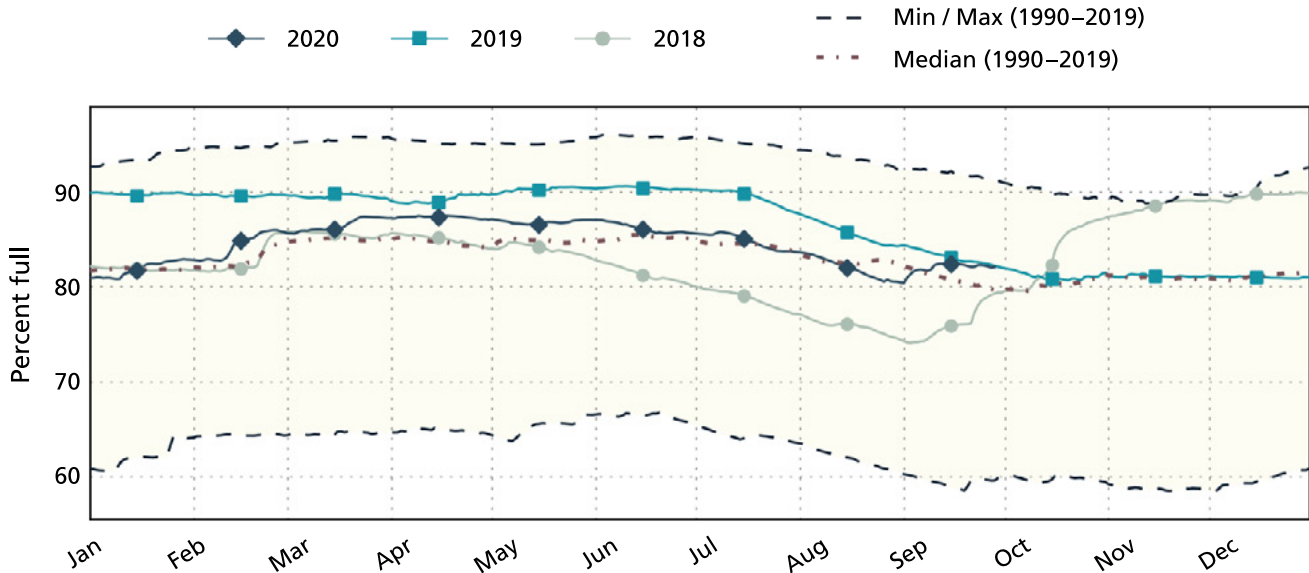

- ◆ 32% now
- ◆ 34% a week ago
- ◆ 25% three months ago
- ◆ 48% a year ago

Statewide reservoir storage

TWDB chart

As we began September, our water supply reservoirs were at 80 percent of capacity, two percentage points below normal for that time of year. As we approach the end of the month, they are at 82 percent of capacity, two percentage points higher than normal for this time of year.
